

Coach Data Schema — Articulation & Delivery

Rubrics, sub-rubrics, and input packet structure for the two audio feedback coach models

ZIQRA AI · INTERVIEW COACH

1 Poor · 0–20	2 Needs Work · 21–40	3 Average · 41–60	4 Good · 61–80	5 Excellent · 81–100
------------------	-------------------------	----------------------	-------------------	-------------------------

Rubric quality scores are presented on this 1–5 scale (mapped from the underlying 0–100 measurement) for presentation purposes.

● Articulation Coach

Pronunciation + Mother-Tongue Influence (MTI) — segmental / phoneme-level

RUBRICS & SUB-RUBRICS ANALYZED

1. Pronunciation

- Phoneme Accuracy — sound-level accuracy vs. expected pronunciation *(in data)*
- Mispronounced Words — word-level flags with severity *(in data)*
- Stress Placement **EXPERIMENTAL** — syllable stress, no real acoustic detection yet *(not exposed)*

2. Mother Tongue Influence (MTI)

- Vowel Patterns — substitution / elongation / shortening *(in data)*
- Consonant Patterns — substitution, missing aspiration, retroflex *(in data)*
- Stress Transfer **EXPERIMENTAL** — native-rhythm stress carryover *(not exposed)*

PACKET FIELDS SENT TO THE MODEL

session_id

links to the Delivery Coach record for the same response

pronunciation

score 1–5, phoneme_accuracy_pct, observations
mispronounced_words[] — word, severity, start/end (top 5)

mti

score 1–5, clarity_impact, top_recurring_issue
patterns_detected[], clarity_risk_words[], patterns[] (top 5)

REAL EXAMPLE (LATEST TEST RUN)

pronunciation.score	5 / 5 (84)
phoneme_accuracy_pct	84%
mti.score	5 / 5 (100)
mti.clarity_impact	low
mispronounced words flagged	5 (all high)

● Delivery Coach

Fluency + Intonation + Rhythm + Engagement — suprasegmental / prosody & pacing

RUBRICS & SUB-RUBRICS ANALYZED

1. Fluency

- Filler Usage — um / uh / like frequency *(in data)*
- Pause Patterns — natural / hesitation / long pause / dead air *(in data)*
- Speaking Speed — words-per-minute pacing *(in data)*

2. Intonation

- Pitch Variation — F0 range / expressiveness *(in data)*
- Energy Variation — loudness consistency, low-energy stretches *(in data)*
- Monotonicity — sustained flat-pitch sections *(in data)*
- Emphasis — vocal stress on key words *(score-only, not exposed)*

3. Rhythm **EXPERIMENTAL**

- Timing regularity — onset-interval pacing consistency *(in data)*

4. Engagement

- Energy Patterns — energy-driven engagement read *(score-only, not exposed)*
- Pause Patterns — pause-driven engagement read *(score-only, not exposed)*
- Speaking Dynamics — animated-vs-flat verdict *(score-only, not exposed)*

PACKET FIELDS SENT TO THE MODEL

session_id

links to the Articulation Coach record for the same response

fluency

speaking_speed, filler_usage, pauses (total + type counts)

intonation

score 1–5, delivery_label, pitch (avg/range Hz)
flat_sections[] — low-energy / monotone spans (top 5)

rhythm engagement

rhythm.score_pct 1–5, rhythm.issues[]
engagement.score 1–5, engagement.level

REAL EXAMPLE (LATEST TEST RUN)

speaking pace	120 wpm (slow)
intonation.score	5 / 5 (95) — Expressive
rhythm.score_pct	5 / 5 (83)
engagement.score	5 / 5 (89) — highly engaging
